

PRO ULC Electric Sprayer atomizer for MicroBLOC[®]

This high speed cold mist blower with a two-stage fan is lightweight and portable for easy use. The high speed motor produces an exceptionally consistent and even spray for thorough cleaning in hard to reach places and discharges the mist with exceptional distance.

A great new way to use MicroBLOC[®] industrial disinfectant – mist through your air duct system to clean and disinfect those hard to get at places that may be affecting the health of your flowers. The MicroBLOC[®] inhibits bacterial and fungus growth and deodorizes by killing micro-organisms, mold and mildew.

Features and Benefits

- The sprayer can dispense both concentrate and diluted solutions with equal efficiency
- The flow control valve allows for a discharge range of 0.025 oz to 20 oz per minute
- Has an easy to clean screen and brush kit to clean the motor
- Full set of easy to follow instructions on sprayer use included

Directions for Use

1. Be sure to wear proper protective clothing
2. Prepare a solution of MicroBLOC[®] and fill the PRO ULV Electric Sprayer (atomizer)
3. Using the sprayer, mist the solution through your airflow system to clean and disinfect in places you have never been able to get to before
4. Allow the fog to come in contact with any and all surfaces you want sanitized
5. Allow to dry
