

## Finishing Touch ULTRA

### industrial hydration and protection spray

*base product plus crop specific activator product*

Maximize the natural freshness of fresh cut flower bouquets, floral designs, and evergreens. Finishing Touch ULTRA industrial hydration and protection spray refreshes, hydrates, and protects with a simple and fast last step measure of insurance before any arrangement goes out a florist's door. A simple fine mist spray is all it takes to maximize customer satisfaction and extend the enjoyment of receiving flowers.

#### For Growers, Wholesalers and Retail Florist

##### Features and Benefits

- Provides ingredients vital to keeping flowers fresh and the color of petals and leaves vibrant.
- Used at the farm level immediately after harvest.
- Prevents premature petal drop, dehydration, wilting and browning.
- Dependent upon cultivar, a simple spray mist aids in extending flower life an additional 1 to 5 days.

##### Directions for Use

- The product comes in 2 parts of liquid concentrates (Part 1 Base and Part 2 Activator).
- Part 1 (base): using the clean pipette, add the concentrate into the water at a rate of 2ml/L (1:500 dilution) and mix.
- Part 2 (activator) using a clean pipette, add the concentrate into the water at a rate of 2ml/L rate (1:500 dilution) and mix.
- Do not mix Part 1 and Part 2 directly together.
- Apply a fine and even mist from a trigger nozzle sprayer onto fresh cut flowers, foliage, evergreens, or potted plants for desired effect.
- Allow the Finishing Touch ULTRA spray to dry before delivery of the arrangement or storage.

##### Container Sizes Available

(availability depends upon region)
