

HydraFlor® Clear ULTRA 100

Concentrate treatment for cut flowers

concentrated liquid

HydraFlor® Clear Ultra 100 is a hydrating treatment for all types of flowers. Using the solution improves the flow of water through the flower stems by clearing air and natural compounds blocking the stem's passageways. It lowers pH and surfactants thus increasing water uptake. This product is formulated for continual use and the same solution can be used repeatedly for up to 7 days, thus decreasing your original water requirements.

For Growers: Use in pre- and post- grading coolers for maximum water uptake.

Features and Benefits

- Concentrated formula (reduced packaging waste)
- Use solution can be repeatedly used up to 7 days in cooler without losing efficacy
- Reduced water requirements
- Conditions flowers for extended dry storage or shipment
- Improves the water uptake and hydration of flowers
- Maintains the stem end by keeping clean and clog-free
- The use solution stays clear in all water types

Directions for Use

- Remove foliage from the flower stem area which will be located below the solution level in the flower container.
- Recut flower stems with a clean, sharp cutting tool, taking off at least 1 inch.
- Place flower stems in a bucket solution of HydraFlor® Clear ULTRA 100 hydrating treatment for 1 - 2 hours at room temperature, or into a cooler for 4 to 5 days (approx. 38° F).
- After treatment with HydraFlor® Clear ULTRA 100, use 200 or Clear 200, a storage and transport treatment, to provide nourishment to the flower during refrigerated storage, yet without stimulating the flower to fully open.

Dosage

- 1:1000 (0.1%) Injector System
Dispense 2.5 ml HydraFlor® Clear ULTRA 100 hydrating treatment per 2.5 L of water.
