

MaxShine

concentrated leaf shine formula for fresh cut foliage and potted plant foliage

liquid

MaxShine is a water-base concentrated shine for leaves, which was formulated for the cut foliage producers to use it in their process to give the foliage a natural gloss.

For the Entire Floral Channel . . . Professional to End Consumer
Use on foliage plants to clean and enhance for greater appearance.

Features and Benefits

- Shines up foliage for longer enjoyment of green potted plants and cut foliage in flower arrangements.
- Lower cost than leaf shine in pressurized cans.
- Keeps foliage clean longer, as there are no oily residues to attract dust.
- Reduces water evaporation of leaves.
- Provides a pleasant, natural scent . . . no offensive odor.
- Suitable for most foliage plants except those with fragile or hairy leaves, succulents, and ferns. Avoid applying on flower blooms and buds.

Directions for use

- Concentrated; must be diluted in water. The recommended dilutions are 1:10 or 1:15, depending upon the desired gloss level.
- Can be applied either by immersion, with a sponge, cloth, or sprayed. Cleans the foliage from dust (especially in the immersion process).
- No need to clean the foliage before the application or to rub it afterwards.

Dosage

- 1 gallon makes 15 or 20 gallons / 60 or 80 L of use solution.

Container Sizes Available

(availability depends upon region)

- 1 gallon / 4 L bottle
