

FloraLife® Dosing System

The Blend Center Unit

A Step Up From Other Models

- Easy push button on/off
- Solution is added in proportion to water flow for accurate mixing
- Adjustable injection rate

Key Features

- Easier and more accurate dosing
- Minimum amount of parts
- Easy twist lock parts, no tools required
- Resists corrosion
- 3/4-inch thread connections for higher output volume
- 12-month warranty
- UL rated up to 125 psi
- NSF51 specified hoses
- EPDM o-rings for enhanced chemical resistance
- pH control

Step By Step Daily Use Instructions

A fresh water source is connected to one end of the system. The system then draws concentrated Floralife® Flower Food solution from a bucket or drum, and mixes it with the correct amount of water. This easily dispenses the solution into containers through a handy hose and wand.

- Make sure the dosing system is connected to the water hose
- Connect uptake tube to the inlet barb and place hose inside Floralife® product container
- Connect output hose so that solution will be available from wand
- Double check to make sure the setting on the dosing injector is correctly set to the recommendations of the product's dosage rate (see chart)
- If the setting is not correct, adjust unit to the correct setting

| Item No. | Description |
|----------|---|
| 83-78140 | FloraLife® Blend Center |
| 83-78141 | FloraLife® Blend Center + hose and dispensing gun |
