

## Automatic Dosing System

FloraLife® automatic dosing system : the most efficient solution to obtain a controlled mixture of the FloraLife® Express Ultra 200 and water.

It works with the only driving force of the water that passes through it, without electricity. The required dosage remains constant regardless of the flow and pressure variations.

- Practical, compact and high performance
- Water flow rate from 10l/h to 3500l/h
- Simple, precise and safe dosing adjustment
- ON/OFF function included, to stop the product injection without cutting off the water
