

FloraLife®

QUICKMIX HANDHELD DOSING SYSTEM

A compact, accurate and
affordable dosing system.

DOSE

www.FloraLife.com

DESCRIPTION: A compact dosing system designed to accurately dispense FloraLife® products right from your hand. Long gone are the days of inconvenient under sink systems. Easily connects to any water source and can be used with the majority of FloraLife® products.

CATEGORY: Dose

USE: All flower and foliage types

BENEFITS:

- An affordable and compact solution for dosing fresh-cut flowers.
- A highly accurate way to dose and avoid sub optimal performance from your hydration and feeding solutions.

WHO: Wholesalers, supermarkets and florists.

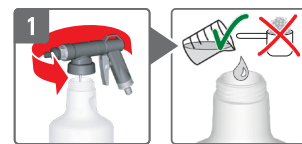

WHY:

- Easy to adjust between dosing settings.
- Compact and easy to use.
- Refillable canister that allows for easy monitoring of solution level.
- Highly accurate dosing.
- Suggested use between 30 and 50 psi.
- Mixes and dispenses FloraLife® products with water at rates of 2ml, 5ml, 10ml and 20ml/L.
- 3/4" GHT connection and European GARDENA® hose connection.

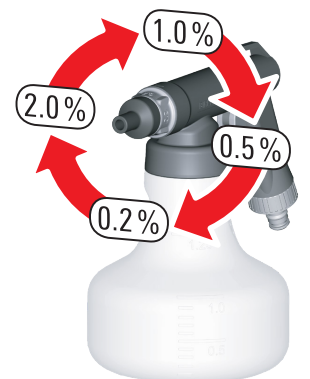

Item Code	Case Pack
#83-78159	5

DOSING:

1. Unscrew mixing unit. Fill with FloraLife® liquid product.
2. Attach mixing unit and set mixing ratio. See grid for product mixing settings.
3. Connect and turn on water source. Pull trigger for immediate and accurate mixing of product.
