

FloraLife® BOTRYTISBLOC BUNDLE

Postharvest treatment for the control of Botrytis on cut Roses

TREAT

www.FloraLife.com

DESCRIPTION: FloraLife® BotrytisBloc Bundle is designed to control Botrytis during postharvest phase. This bundle is core to many postharvest protocols and a valuable tool to reduce our waste footprint in the supply chain.

CATEGORY: Treat

USE: Cut Roses

BENEFITS:

- Controls Botrytis.
- Longer vase-life for cut flowers.
- Reduces waste in the supply chain.

WHO: Growers

WHY:

- An assurance that freighted flowers arrive protected from Botrytis damage.
- Ensures positive consumer experience, leading to repeat purchases.
- Less customer complaints.

INFORMATION:

- WHO class III Slightly hazardous: limited PPE required for mixing and application.
- SDS available on request.
- For professional use and postharvest use only.

Item Code	Product
#80-87001	FloraLife® BotrytisBloc Bundle

DOSING:

Application recommendation for FloraLife® BotrytisBloc Bundle

FloraLife® BotrytisBloc Bundle	Rate per Litre	Rate in 100L drum
FloraLife® BotrytisBloc 430SC	0.5ml	50ml
FloraLife® Wash	0.25ml	25ml
FloraLife® AddIn	2.5g	250g (1 cup)

Refer to individual product labels for full information.

To make 100L solution:

- Measure 50ml FloraLife® BotrytisBloc 430SC, 25ml FloraLife® Wash, 250g FloraLife® AddIn powder.
- Make sure not to exceed the recommended dosage of each product.
- Add measured products into 100L of water in a drum (use clean water suitable for postharvest treatments).
- Mix solution in the drum, mix well before use.
- If used as a dip, flower heads/ buds are submerged into the FloraLife® BotrytisBloc Bundle solution (for at least 10 seconds) while turning gently to ensure full coverage for effective treatment. The excess solution can then be drained and the flowers processed under standard conditions.
